Designer Statement

I desire to work in a professional environment that allows me to creatively and critically create works that both exemplify a personal style as well as stay within a client's vision. My goal is to work with a diverse set of clients, colleagues and leadership to better hone my craft and to create a product that leaves others and myself satisfied.

Education

University of Colorado, Boulder

Major - Film Studies

Minor - Technology, Arts, and Media

Focus on design, web, graphic, brand, and also experience with a wide array of coding languages and design principles

Experience

EchoStar Corporation - January 2015 to present

Web Designer/Developer

- Front end web design and development for websites and web applications; provided these supports to Marketing, Satellite and Engineering segments. Success depended upon creating websites using mockups, wireframes, and coordinating direction from senior leadership.
- Front end design and development on new BtoC products and large websites such as www.SAGEbyHughes.com.
- Established style guidelines while providing feedback to improve current web standards.
- Lead liaison and project manager between App development, marketing, and backend cart development groups. Teams were both in headquarters as well as in other states.
- Minor back end code development in collaboration with App development teams (C#).

US Geological Survey - 2013 to 2014

Hydrologic Technician

- Worked in laboratory testing water samples as well as taking data. Created a web page for USGS Project and persona pages using HTML and CSS.

NAPA + RIMA - 2013 to 2014

Brand and Product Design

- Developed brand identity including logo and package design with illustrator and Photoshop. Provided ongoing support when design changes needed implementation.

Prism Home Inspections - 2013 to 2014

Web Designer/Marketing

- Design of web pages for Prism Home Inspections, Savannah, GA office and Hilton Head, SC, office. Marketing support in SEO and brand recognition.

Cafe Verde Imports - Summer 2013

Web Designer/Graphic Designer Internship

- Designed and maintained website using Twitter Bootstrap and extensive customization of the base HTML and CSS code. Contributed to brand image with brochure designs that were distributed to coffee shops.
